

## 2021 TECH ADVISORY ADDITIONS

### **Helmets**

The Snell 2010 rated helmets expired in 2020. You **MUST** use a Snell rated SA2015 or a Snell rated SA 2020 Helmet. Motorcycle rated helmets are **NOT** acceptable.

### **Head & Neck Restraint Systems**

A head and neck restraint system **MUST** be implemented when using harnesses. This is for drivers and passengers. If either the driver or passenger does not have a head and neck restraint system then both must use the factory 3-point belts.

### **Roll Bars**

Roll bars are strongly recommended for all cars with 5+point harnesses to complete the whole safety system.

### **Rear Collision Automatic Braking and Lane Departure Systems**

Additionally as per 2017, cars with automatic braking and/or lane drift correction systems **will NOT be permitted** to participate unless the systems can be fully turned off for the track sessions; proof that the systems can be turned off must be provided (i.e., information in Owner's Manual, etc.)”

### **Coolant Leak Advisory**

To reduce the risk to all the participants in a High Performance Driving Event due to the known potential for an unintended coolant leak in certain affected automobiles limited to models Cup Cars, “GT2”, “GT3”, “RS” and “Turbo” in the “996” and “997” series produced between 1999 and 2012 with the GT-1 style Mezger engine block. It is highly recommended that affected automobiles participating in any NRPCA High Performance Driving Event affect repairs consisting of either 1) pinning the eight (8) coolant tubes or 2) welding the eight (8) coolant tubes to their casting. Series 997 affected models are also advised to replace the two (2) plastic coolant elbow connectors that have double O-rings.

### **Ram and PanaVise Suction Cup Mounts - ONLY**

Must be inside car

Cannot block visibility

Must be securely mounted

Limited to two suction cup devices

Tethering is recommended

Dataloggers (e.g. Aim, ApexPro, MoTeC) must be mounted per manufactures specification
